EDUCATION

Computer Science with AI at University of Bath

Sep 2021 - Jun 2024

- Top 5 in the UK for computer science
- Graduated with a 1st-class honours

4 A*'s at A-level

- Maths+Further, Physics and Computer Science

SKILLS

- Proficient in Python, JavaScript/Node, Ruby
- Proactive, high-agency
- Leading projects including planning and management
- Technical writing, communication

EXTRA

Weizmann Institute of Science - Davidson Programme

TEDx talk on project-based learning

WORK EXPERIENCE

CTO / Co-founder - FrameSports Apr 2024 - Present

- Early-stage startup that automatically extracts data from rugby games using computer vision
- FrameSports provides this service to teams, who improve their performance using the data
- Built a human-in-the-loop computer vision pipeline from the ground up

Technical Lead - Ditch Carbon Aug 2022 - Apr 2024

- VC-backed startup with clients such as SAP, Coupa
- Managed team of three developers
- Used a combination of LLMs and machine learning models to automatically extract environmental data from reports. Currently used for thousands of reports
- Designed and implemented an API that outputs our research in an accessible format
- Used Ruby on Rails for the API and Python for data analysis

Junior Developer - Konnek App Jul 2021 - Aug 2022

- Created user interfaces for the administrative side of the platform. Using a React front-end and Node.js backend
- I contributed to building user-friendly features that visualise platform analytics to provide actionable next steps for sales
- I was mentored by Andrejus Kostarevas, a skilled software engineer who later joined GitHub
- This experience provided me with valuable insights into web development
